

Film Processing Chemicals

Processing Chemicals for Prostar* or Similar Type Processors

Item number	Description	Price per case	Price per 5+ cases
32-249	Vitamatic Plus Microfilm Developer: A High Stability, Extended Life Developer designed to process double the film capacity of conventional developers used in Prostar or similar type processors. Four 1 gallon bottles per case Ready-to-use. Do not dilute.	\$69.00 cs.	\$65.00 cs.
32-254	Vitamatic Microfilm Fixer: Four 1 gallon bottles per case. Ready-to-use. Do not dilute.	\$44.00 cs.	\$41.00 cs.
	Universal Developer for Deep Tank Processors or Table Top Processors		
33-171	Microflo Developer & Replenisher: A single solution concentrate featuring a 1:7 dilution ratio when used in deep tank processors and a 1:5 dilution when used in rapid speed/high temperature processors. Suitable for use as both a Source Document or COM Reversal First and Second Developer. Four 1-gallon bottles per case. Makes up to 32 gallons of Developer or 24 gallons of Replenisher.	\$99.00 cs.	\$94.00 cs.
44-661	Chem-Mix Vitafix Fixer & Replenisher: Concentrate solution fixer Four 5-quart bottles per case. Makes 20-40 gallons.	\$74.00 cs.	\$70.00 cs.
	Processor Cleaners		
4903P	Developer Systems Cleaner Powder 20 packs per case.	\$130.00 cs.	
4900FC	Systems Cleaner Fixer T2 Fixer Systems Cleaner 6 bags per case.	\$56.00 cs.	
	Deep Tank Full Reversal Processing for COM Reversal Films		
33-171	Microflo Developer & Replenisher See Description Above	\$99.00 cs.	\$94.00 5+ cs
44-661	Chem-Mix Vitafix Fixer & Replenisher (Part "A" Only) Four 5-quart bottles per case. Makes 20-40 gallons	\$59.00 cs.	
	SILVER RECOVERY CARTRIDGES		
SR5G	Silver Recovery 5 Gallon Container	\$99.00 ea.	
SR3.5G	Silver Recovery 3.5 Gallon Container	\$90.00 ea.

METHYLENE BLUE TESTING

For measuring residual Thiosulfate in Microfilm and Microfiche.

A quantitative Methylene Blue test program for measuring residual Thiosulfate in film or fiche.

Results stated in micrograms per CM² of emulsion.

On-line visual comparison testing:

Complete with all test reagents and glassware. Enables you to run a continuous control on the efficiency of your processing system. Side-by-side comparison with the standard tells you, within minutes, if your system is producing films or fiche of archival quality.

Reagents for on-line visual comparison testing:		
The following list of reagents is needed to perform on-line visual comparison tests.		
Product Number	Description	Price each
32-500	Eluent: Ready to use. 250cc, sufficient for 50 tests. Shelf life: 8 months.	\$69.00
32-501*	Borohydride Reagent: Part A: 30cc of liquid. Part B: Powder in bottle. Sufficient for up to 150 tests. Shelf life: One week after mixing part A & B.	\$53.00
32-502	Acetone: 30cc, ready to use. Sufficient for up to 150 tests. Shelf life: 8 months.	\$51.00
32-503	Ferric Sulfate Reagent: 30cc Ready to use. Sufficient for up to 150 tests. Shelf life: 8 months.	\$56.00
32-504	NNDPS Reagent: 30cc, ready to use. Sufficient for up to 150 tests. Shelf life: 8 months.	\$56.00
32-505**	Standard Reagent – Concentrated: 30cc concentrated solution. Usage rate: 2cc makes 1 liter of solution needed to prepare standard. Shelf life: Concentrate: indefinite. Diluted standard solution must be used same day as prepared.	\$39.00
* Although Borohydride Reagent is supplied in a quantity to perform up to 150 tests, it must be used within 7 day's after part B has been mixed with part A. The amount supplied is the smallest amount that can be economically packaged.		
** The 30cc of Standard Reagent supplied will be sufficient for up to fifteen tests. The solution from concentrate must be freshly mixed for each test.		

Glassware for on-line visual comparison testing:		
The following list of Glassware is needed to perform on-line visual comparison tests.		
Product Number	Description	Price each
32-600	Film platen guide for cutting required test film size.	\$6.00
32-602	Teflon coated tweezers for removing film from viles.	\$101.00
32-604	Calibrated pipets for delivering 1 to 5cc. Minimum needed (3). One for Eluent measurement, One for Borohydride measurement, One for Standard Reagent measurement.	\$9.00
32-605	25cc Graduated cylinder for measuring Standard Solution/Eluent Mixture for Standard Control Reagent.	\$39.00
32-606	1 Liter Polypropylene volumetric flask for mixing Standard Reagent.	\$141.00
Suggested ordering rate: Contents of each reagent bottle are such that a specific ordering ratio can be maintained to minimize waste.
